

ScotchBlue™ Painter's Tape EXTERIOR

Until now, outdoor painters have been making do with masking tapes that can't handle challenging weather. We're talking tape that falls off in rain and humidity, or bakes to the surface in the hot sun.

ScotchBlue™ Painter's Tape for Exterior Surfaces is the only masking tape designed specifically for outdoor use. For painters who want to get the job done right the first time, with less need to retape or touch up, ScotchBlue™ Painter's Tape for Exterior Surfaces is the new go-to tool.

Removes cleanly—no residue, slivering or tearing

A proprietary adhesive grips exterior surfaces, yet allows the tape to remove cleanly up to a week later. Even after exposure to high heat and direct sun, this tape leaves no residue behind. And the plastic backing helps the tape come off in one piece, without slivering or tearing.

Holds strong in challenging weather

A waterproof plastic backing helps the tape stay in place, even in rainy or humid conditions. This is hardworking tape for hardworking pros.

Conforms to curves

Taping off arched windows and doorways is no problem—this tape flexes to mask curves. Pair with the 3M™ Hand-Masker™ tool to quickly mask large areas.

Great paint anchorage—no flaking

A unique microgrid backing helps prevent flaking while providing exceptional paint anchorage.
